

**22.1-2****ELECTRIC OIL DRAIN PUMP**

An electric oil drain pump makes essential oil changes considerably easier. The pump is permanently installed, thus eliminating the dirt and inconvenience of manually draining the sump. The pump is self-priming and is also suitable for flushing and as a bilge pump.

**Note!** Do not use the pump for pumping paraffin or petrol.

Pos.no.	Part no.	Voltage
22.1	843114-0	12 V
22.2	843410-2	24 V

**Technical data:**

Pressure Bar	kPa	Flow l/min	Amp draw., A	
			12 V	24 V
0.15	15	14.0	7.2	3.5
0.6	60	10.5	7.9	3.8
0.9	90	7.0	8.7	4.2

Fuse required	16.0 A	8.0 A
---------------	--------	-------

**The kit contains:** Electric motor with impeller, fittings for mounting on the bulkhead or similar, electrical cable with clips and connectors for connection to battery, 3 metres rubber hose, internal diameter 12 mm, hose clips.

**22.3-5****SEPARATELY MOUNTED OIL FILTER**

Separately mounted oil filters can be used for engine installations where the side-mounted standard filter is not easily accessible, e.g. in narrow engine rooms or for twin installations. The filter is then mounted on the exhaust riser.

Pos.no.	Part no.
22.3	3860451-8
22.4	3850882-6
22.5	3860449-2

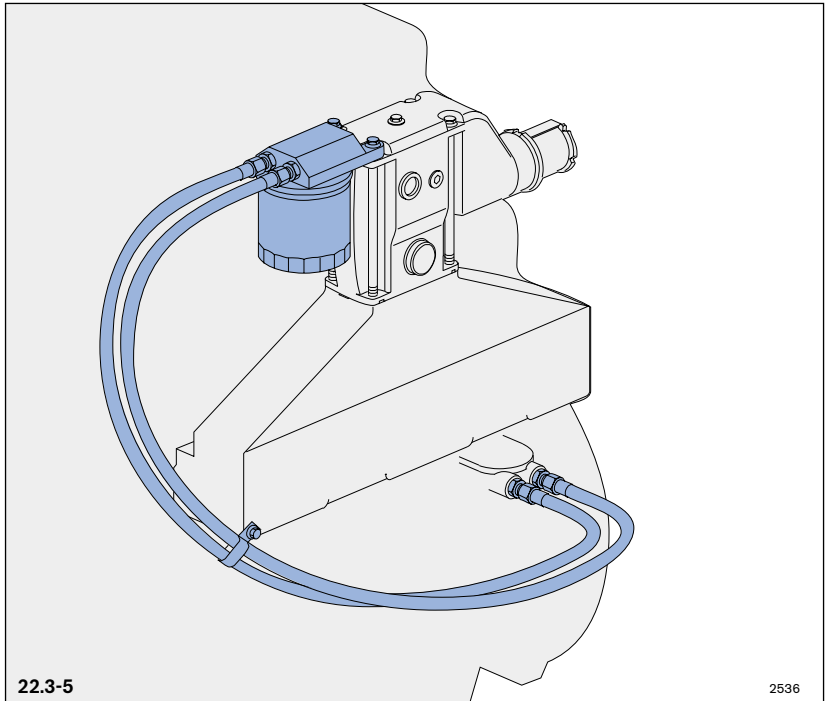

**22.7****OIL DIP STICK**

Part no. 859377-4. Kit for mounting the oil dipstick on the left side of the engine, for improved accessibility, e.g. when using twin installation.
